<i>How do we lessen these fears?</i>	Hire the incumbents as subcontractors under exclusive agreements
<i>Why do we want to seek this opportunity?</i>	Large revenue increase, high probability of a win

<i>Why would the customer choose us?</i>	They know and trust J Hughes, our Proposed Project Manager, and R Fuller, our proposed Senior Security Engineer
<i>Negative factors in bidding</i>	Large proposal effort IBM could be a formidable competitor Subcontractors notorious for not assisting in proposal efforts
<i>How much of our intelligence is fact rather than wishful thinking?</i>	Fact

Instructions: From the Sales Intelligence Questionnaire

- Prepare a Selling Point Table like the example below for a website development project. Break up the table into individual tables by proposal section, and copy the individual tables into the appropriate section of the outline.
- More detailed selling points will emerge as you develop the detailed proposal outline. Selling points can be used as the basis for writing the features and benefits of your proposed solution.
- Individual selling points may be copied into several places in the outline. For example, Technical Approach selling points should be placed at the beginning of the Technical Approach and subdivided into the selling points that should be addressed in each significant task of the Technical Approach.

TOOL: IN ANTICIPATION OF THE BID COMING OUT, BUILD A SELLING POINT TABLE – TO HELP YOU DEVELOP YOUR PROPOSAL STRATEGY

Example Selling Point Table:

<u>Customer Requirement</u>	<u>Source of Requirement</u>	<u>Selling Points (YOUR SOLUTION UNIQUE TO THE CUSTOMER AND MUST COME FROM THE SALES PROCESS!)</u>	<u>Proposal Section</u>
Lack of an overall framework for IT support and services	Meeting with agency CIO Meeting with Security Engineer	Implement IT Infrastructure Library (ITIL) Our experience with IT Enterprise Architecture	Executive Summary Technical Approach Corporate Experience
